

Ø 4

The smallest model from the Ø Collection, the stylish Ø4 (shown above and on front cover) incorporating the state-of-the art Fire-Slide control, offers big fireplace performance but with small fireplace output. Designed to heat areas typically of around 75m², the Ø4 also incorporates a preheated Airwash System, allowing you to enjoy the comfort and beauty of the dancing flames without you being overheated.

Technical Data
Output kW: 5

Flue Diameter: 125mm
Fuel: Wood

Ø 6

There can be no better example of functionality and form than the Ø6. Sleek lines and sophisticated style makes this one of the cleanest fireplaces in today's modern market. The Ø6 is capable of burning most smokeless fuels as well as logs of up 375mm in length. Featured also is the Fire-Slide control, allowing the Ø6 to burn for very long periods on a single charge of fuel. Suitable for areas up to 120m².

Technical Data
Output kW: 3-6

Flue Diameter: 150mm
Fuel: Wood

Designed with the larger room in mind (up to 150m²), the Ø8 will add a touch of class to almost any interior designer's concept. Smooth lines coupled with double doors, makes this piece of 'heating furniture' fit into the classic-modern category in design. Incorporating the Fire-Slide control, the Ø8 is capable of many hours of unattended burn time. As with all of the stoves from the Ø Collection, the in-built clean-burn combustion system will help keep both your chimney and the environment clear of excessive smoke emissions.

Technical Data
Output kW: 3-9

Flue Diameter: 150mm
Fuel: Wood

GENERAL NOTES:

Our policy is one of continual improvement and development. The right to change specification without prior notice is reserved. Morsø Fireplaces products must be installed by a competent person to local regulations in force and in accordance with the manufacturer's installation instructions and they should not be fitted onto a carpet or floor of combustible materials.

No liability is accepted for problems caused by poor installation or misuse of the product.

Heat outputs are calculated on refueling every 2 hours and are variable based on the quality of the fuel burnt and the chimney/flue system.

The output of the appliance will be severely affected if the chimney/flue system is not adequate or suitable for the appliance.

The classic Morsø fire tools are a three-piece set that comes with a cast iron base, with the signature Morsø squirrel on top. Height: 69cm.

This practical, protective mitten is made with thick leather and is available in black with the Morsø logo in white. The mittens are available for both left and right hand.
